OBJECTIVE

Experienced Automation Test Engineer with 4 years of experience designing, developing, and executing automated test scripts, along with comprehensive manual testing strategies, to ensure high-quality software delivery. Proven track record of reducing defects by 90% and improving product reliability by 80%. Skilled in identifying critical issues early, collaborating with cross-functional teams, and driving continuous improvements in software quality. Seeking to contribute analytical skills, attention to detail, and a quality-first mindset to a forward-thinking team committed to delivering exceptional user experiences.

SKILLS

- **Programming Languages:** Java, C#
- **Testing Knowledge:** Manual testing, Automation testing and API testing
- **Test Automation framework:** BDD - Cucumber, TestNG, SpecFlow, NUnit
- **Database Skills:** Microsoft SQL server management studio
- **DevOps & Version Control Tools:** Git, GitHub, Bitbucket
- **Build Tools:** Maven
- **Project Management Tools:** JIRA, Confluence, Azure
- **API Testing:** Postman, Rest Assured
- **Automation & Testing Tools:** Visual studio, IntelliJ IDEA, MABL
- **AI-Powered Tools:** GitHub Copilot

PROFESSIONAL SUMMARY

- Proficient in developing automation scripts using **Selenium WebDriver** with **BDD frameworks** like **Cucumber/SpecFlow** and **NUnit** for robust test automation.
- Strong knowledge of **Core Java and C#** with expertise in **Object-Oriented Programming(OOP)** concepts for designing scalable and maintainable automation frameworks.
- Experienced in implementing **Data-Driven Testing**, utilizing **Page Factory**, and troubleshooting exceptions during test execution to ensure smooth automation workflows.
- Solid understanding of **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)**, ensuring efficient planning, execution, and delivery of quality software products.
- Proficient in **Agile methodologies**, including **Scrum and Kanban**, with the ability to adapt to changing project requirements and tight deadlines.
- Experienced in using **JIRA and Azure DevOps** for Agile project management, including sprint planning, backlog tracking, and progress monitoring.
- Skilled in **Smoke, Sanity, and Regression testing** by developing and executing comprehensive **test plans and test cases** to ensure software quality and reliability.
- Proficient in creating **Defect Reports, Test Summary Reports**, designing robust XPaths for **dynamic web element** identification, and generating reports using **Extent Reports**.
- Knowledgeable in API Testing using Postman for validating **RESTful services** through request/response validation, parameterization, and automated test execution.
- Good understanding of DOM Structure for efficient identification and interaction with **dynamic web elements** during automation testing.
- Skilled in delivering client demos to showcase product functionality, testing outcomes, and automation framework capabilities, ensuring clear communication and stakeholder engagement
- Excellent **analytical, problem-solving, and communication skills** with a proven ability to collaborate effectively with cross-functional teams to ensure high-quality software delivery.

EXPERIENCE

- TAVANT TECHNOLOGIES

Senior Quality Engineer

2024 Oct - Present
Bangalore
- PROJECT: Truterra (Land O'Lakes)

Truterra™, a sustainability-focused digital platform by Land O'Lakes, delivers data-driven insights and precision agriculture solutions for carbon credit management, soil health assessment, crop optimization, and tracking.

ROLES AND RESPONSIBILITIES:

Analyzed user stories and prepared test scenarios, test cases, and validations based on acceptance criteria.

Collaborated with Stakeholders to define Test objectives, scope, and Strategies aligned with project goals.

Performed Regression, Smoke, Sanity, and User Acceptance Testing using automated scripts and manual techniques.

Created and maintained automated test scripts using BDD Cucumber framework with Page Object Model (POM).

Performed API testing using Postman to validate RESTful web services for functionality, reliability, performance.

Provided end-to-end testing and sign-off for software releases, ensuring product readiness and quality.
- MPHASIS LIMITED

Software Engineer

2021 Dec - 2024 Oct
Bangalore
- PROJECT: Charles Schwab - Retirement Plan Services

Worked on Charles Schwab's Retirement Plan Services project, developing secure applications for retirement savings, record-keeping, and enhancing participant experience

ROLES AND RESPONSIBILITIES :

Developed and maintained Test Plans, Zephyr test cases, test scenarios, and test scripts ensuring software quality.

Executed Manual and Automated testing using Selenium WebDriver and MABL tools.

Created and maintained automated test scripts using Data-Driven Testing framework and Page Object Model (POM).

Integrated automated tests into CI/CD pipelines using Bitbucket for streamlined software delivery workflow.

Documented and reported defects in JIRA, providing detailed and accurate defect descriptions.

Participated in Sprint Planning, Daily Stand-ups, and Retrospectives within Agile framework.

HONORS AND AWARDS

- Awarded Spirit of Winning for completing all projects in a timely manner and for efficient testing.
- Synergic Workforce award for Team contribution.

EDUCATION

- BE Bachelors in Engineering (ECE)

Sri Ramakrishna Institute of Technology

GPA: 8.1 / 10

Completed in 2021
Coimbatore, Tamil Nadu

CERTIFICATIONS

- MABL: Foundations and Advance

Appium mobile testing (Android/IOS) from scratch + Framework

Cambridge English Entry Level Certificate in ESOL International (Business)

NOV 2023
MAR 2022
OCT 2018
